

VIDEO

IN EDUCATION PROCESS

Video in Education Process (2018-2020) is a Strategic Partnership for Adult Education funded under the Erasmus+ Programme of the European Union.

TARGET

Professionals/Educators working with groups of people with limited abilities, few qualifications and socially excluded.

AIM

Broaden the scope of activities for adult education by introducing activities that use various forms of video-making, both in terms of methodology and ICT.

INNOVATION

1. Focus on specific tools in **adult education** for groups with **specific needs**.
2. Activities can be practiced by unskilled and inexperienced individuals; applying audiovisual means strengthens the message, simplifies teaching and learning processes, and improves **digital skills**.
3. Assessment and **critical approach** to selected techniques.
4. Cooperation of organizations that use **audiovisual** forms in their everyday work with those that focus on methodology and education processes.

The project partnership came into being during the project “Innovative Methods of Adult Education for the Future of Europe” (Erasmus+). At that time, we noticed how much audiovisual content was suitable for working with low-qualified and digitally low-skilled groups.

RESULTS

Report: theoretical description of various methods and techniques related to adult education especially for groups of people with limited abilities and qualifications.

Practical guidebooks based on pilot educational activities using video forms. We will test tools/methods using video for working with groups of adults with limited opportunities; the aim is gathering feedback/suggestion/critical comments that will help us to improve a tool/method.

Online tool with a description of selected education methods using video forms. The content will be published both as text (guides, scripts, manuals) and as audiovisual material (tutorials, showcases, etc.).

HOW

4 Transnational learning, teaching and training activities of 5 days of duration for the employees/professionals.

1st Training (Cotopaxi): Technical tips connected with creating videos for educational purposes.

2nd Training (CIAPE): Creating CV videos as a chance to improve one's situation on the labor market for the people of fewer qualifications and skills.

3rd Training (Real Time): How to use the Participatory Video technique. It focuses on using the audiovisual not as means of supporting a specific education process, but as the core of this process.

4th Training (Magenta Consultoría): How to use existing short video materials in educational activities.

After each one of the training activities, professionals will prepare a pilot course (workshops, trainings, etc.) to test video tools in practice with groups of people with limited abilities; their feedback will help us to develop and adapt education programs of the results 2 and 3.
